

Your expert in Instant Communications

With more than 40 Years of Experiences in this Domain,
we can propose you the best Solution concerning your need
in Communication.

Discover the **First PoC Solution** (Push to talk over Cellular)
with "Live Video Sharing".

Wi-Fi/3G/LTE and Smart devices-based Various professional video push-to-talk service

The Feature of PoC

- Video Ptt
- Real-time Video Sharing
- Text Messages
- Transfer Images and Documents
- Geolocation
- History of all call

We offer you the first **complete PoC** (Ptt over Cellular) real-time video sharing Solution with a multitude of possibilities.

Keep the advantage of group instant communications (conference) of radio communication using your smartphone.

Ptt, Messages, Live video sharing, geolocation, Group and individual connections.

This solution avoids the investment of a portable or mobile Radio structure.

The app installed on your smartphone is connected directly to our Poc server in Europe through yopoc-2.tiffur operator's 3G/4G network.

We can also offer interconnection between your current radio network (Digital/analogue) and the Poc's Service.

The app is available for Android Smartphone, Apple IOS and Windows.

Rates start from £ 7.-/month

Advantages:

With **PoC Technology**, you remove reaction time by being constantly connected. As a result, just press the button on the screen to speak directly to a group. (conference)

In the event of a confidential call, the individual call is also possible and transmitted immediately.

The Poc solution prevents you from investing in a Radio park.

The app is installed directly on your smartphone.
